

# HOLIDAY LIGHT EXCHANGE

Lodi Electric Utility would like to make the upcoming holiday season a little less costly, and perhaps a little less stressful.

On Saturday, November 19 from 7am until 9am in the north parking lot of Hutchins Street Square (Oak Street entrance), the utility will be giving away 100 new LED, energy efficient holiday light strings. To participate, you must show proof of Lodi residency and turn in a string of LON-LED (traditional) holiday lights. In exchange, the utility will give you a free string of LED holiday lights – **one per family / customer of record**.

In addition, the utility will be providing 150 coupons, valued at \$5 per coupon, good toward the purchase of LED holiday light strings at any Lodi retail outlet. There is a limit of three (3) coupons per family/customer of record.

Our **Holiday Light Exchange** is available on a first-come, first-served basis.

Questions? Please give us a call at 333-6815, and in advance: Happy Holidays from your Lodi Electric Utility Department.

\*LED holiday lights consume approximately 75% less electricity than standard or traditional holiday lights; less energy consumption reduces your monthly electric utility costs!

(This rebate program is paid for by the Lodi Public Benefits Program, a state-mandated program.)
